Congrats on the car I have a 98 VR6 myself and I love it. I will share an experiance I had with slipping gears on a 2001 Isuzu Trooper with an automatic. I know it's a different car but it might turn a wheel or two in your head. This Trooper had a brand new transmission in it with less than 15,000 miles on it.

My son has 98 automatic 98 VW Jetta, 2.0
Liter engine which is now throwing a
P103 code. We have just replaced the
Mass Flow Sensor, cleaned the fuel
injectors. Only hose leak is the hose from
the brake booster to the intake manifold
but don't know if this is causing the code.
Intake manifold was also changed. Hope
you can help.

OBDII is the second generation of on-board diagnostics. It is likely that it is a 12v (12 valves in the cylinder head) if it is the US spec GTI of that year. That's rated at 172hp. It is possible that a previous put a newer 24v (4 valves per cylinder) engine in the vehicle. That engine is rated at 201hp in US configuration.
