What is economics? What can - and can't - it explain about the world? Why does it matter? Ha-Joon Chang teaches economics at Cambridge University, and writes a column for the Guardian. The Observer called his book *23 Things They Don't Tell You About Capitalism*, which was a no.1 bestseller, 'a witty and timely debunking of some of the biggest myths surrounding the global economy.' He won the Wassily Leontief Prize for advancing the frontiers of economic thought, and is a vocal critic of the failures of our current economic system.

Take Back the Economy dismantles the idea that the economy is separate from us and best comprehended by experts, demonstrating that the economy is the outcome of the decisions and efforts we make every day. i.e. getting fundamental information from one mind to another. In clear and simple terms, this book separates truth from emotion, economics from politics, and offers undeniable proof of our country's destiny if each of us continues to elect politicians while lacking a clear understanding of basic economic principles. If you think you understand economics, think again. This book is an eye opener, not only with its content, but because these concepts are so simple. What is truly amazing is that the knowledge in this book is not common knowledge. You cannot call yourself a responsible citizen unless you read *How to Understand Economics in 1 Hour* prior to voting in the 2012 US election. It will change the way you see the government, politicians, and the future of our country.
