subject. A former United States ambassador to Peru, David C. Jordan has testified before the U.S. Senate and House Foreign Relations committees and has consulted with various government security organizations. His account of government protection of the criminal elements intertwined with local and global politics challenges many of the assumptions of current drug policies. Using examples from South America, Mexico, Russia, and the United States, Jordan shows that the narcotics problem is not merely one of supply and demand. Jordan argues that many national and international financial systems are

dependent on cash from money laundering, and some governments are far more involved in protecting than in combating criminal cartels.

This edition of the "Yearbook on Human Rights in Developing Countries" contains contributions on the role of the right to development in the development assistance policies of Norway and of the European Union. These thematic studies will help to provide a better perspective on the place of the right

to development, a human right which was recognised by the General Assembly of the United Nations back in 1986. The Yearbook also contains seven country reports, which assess human rights trends in countries in the South, covering civil and political as well as economic, social and cultural rights during the period 1993-1995. The reports follow a common structure to allow for comparisons among countries. The present volume contains reports on Bhutan, Egypt, El Salvador, Ethiopia, India, Mexico and Uganda. The "Yearbook on Human Rights in Developing Countries" is a joint project of the Chr.

A myth-busting, 100-year history of the Mexican drug trade that reveals how an industry founded by farmers and village healers became dominated by cartels and kingpins. The Mexican drug trade has inspired

prejudiced narratives of a war between north and south, white and brown; between noble cops and vicious kingpins, corrupt politicians and powerful cartels. In this first comprehensive history of the trade, historian Benjamin T. Smith tells the real story of how and why this one-peaceful industry turned violent. He uncovers its origins and explains how this illicit business essentially built modern Mexico, affecting everything from agriculture to medicine to economics—and the country's all-important relationship with the United States. Drawing on unprecedented archival

research; leaked DEA, Mexican law enforcement, and cartel documents; and dozens of harrowing interviews, Smith tells a thrilling story brimming with vivid characters—from Ignacia “La Nacha” Jasso, “queen pin” of Ciudad Juárez, to Dr. Leopoldo Salazar Viniegra, the crusading physician who argued that marijuana was harmless and tried to decriminalize morphine, to Harry Anslinger, the Machiavellian founder of the American Federal Bureau of Narcotics, who drummed up racist drug panics to increase his budget. Smith also profiles everyday agricultural workers, whose stories reveal

both the economic benefits and the human cost of the trade. The Dope contains many surprising conclusions about drug use and the failure of drug enforcement, all backed by new research and data. Smith explains the complicated dynamics that drive the current drug war violence, probes the U.S.-backed policies that have inflamed the carnage, and explores corruption on both sides of the border. A dark morality tale about the American hunger for intoxication and the necessities of human survival, The Dope is essential for understanding the violence in the drug war and how decades-old myths shape

Illicit cross-border flows, such as the smuggling of drugs, are proliferating on a global scale. This volume explores the selective nature of the state's retreat, persistence and reassertion in relation to the illicit global economy.

Does market liberalization promote democracy? The accepted answer from scholars, pundits, and politicians alike has been yes. However, the contributors to this innovative study of market reforms and political change in Mexico

and the People's Republic of China argue that this easy equation is not only empirically uncertain but methodologically flawed. Using comparative contextual analysis, the contributors carefully identify the elective affinities between these two very different polities to reveal key variables that determine how markets will affect democracy, particularly law as the 'rudder of democracy' and the role of political culture in civil society.

Mexico's "democratic transition" has created a competitive electoral system and a formally

plural state. Besides, a peculiar wave of insurgency, started in 1994, has challenged the alleged moderating effect of democratic transition. This book argues that socioeconomic inequality is the main factor behind this combination of democratic and undemocratic trends.

The signing of the North American Free Trade Agreement (NAFTA) was expected to signal the beginning of a new era of close co-operation between Mexico and the United States.

Subsequent events, however, have introduced new tensions into the relationship. The 1995

economic collapse in Mexico sharply curtailed economic growth and lowered the demand for U.S. exports. The result has been a substantial deficit in U.S. trade with Mexico and renewed arguments that trade with Mexico reduces the employment opportunities of low-skilled workers in the United States.

Immigration, both legal and illegal, has grown as a subject of contention between the two countries. Mexico has also come under increased focus as a conduit for the flow of drugs into the United States. In this book, scholars from the United States and Mexico examine the major elements of the bilateral

relationship. The economic dimension is highlighted in two papers that focus on the effects of NAFTA on trade and financial transactions. The political and social dimensions are taken up in three papers on immigration, drug trafficking, and environmental concerns. The contributors include J. Enrique Espinosa and Pedro Noyola, SAI Consultores, Mexico; John Williamson, Institute for International Economics; Juan Carlos Belausteguigoitia, Ministry of the Environment, Mexico; Peter Smith, University of California, San Diego; and George Borjas, Harvard University.
