Business Communication is the newest Business Communication textbook that was created with students and professors needs in mind. A unique approach to a hands-on course, written by the co-authors of Business Communication: Making Connections in a Digital World, 12/e, provides both student and instructor with all the tools needed to navigate through the complexity of the modern business communication environment.

Instructors consistently ask for a human biology textbook that helps students develop an understanding of the main themes of biology while placing the material in the context of the human body. Mader's Human Biology was developed to fill this void. To accomplish the goal of improving scientific literacy, while establishing a foundation of knowledge in human biology and physiology, Human Biology integrates a tested, traditional learning system with modern digital and pedagogical approaches designed to stimulate and engage today's student. Multimedia Integration: Michael Windelspecht represents the new generation of digital authors. Through the integration of multimedia resources, such as videos, animations and MP3 files, and in the design of a new series of guided tutorials, Dr Windelspecht has worked to bring Dr. Mader's texts to the new generation of digital learners. A veteran of the online, hybrid, and traditional teaching environments, Dr. Windelspecht is well versed in the challenges facing today's students and educators. Dr. Windelspecht guided all aspects of the Connect content accompanying Human Biology. The authors of the text identified several goals that guided them through the revision of Human Biology, Thirteenth Edition: build upon the strengths of the previous editions of the text, enhance the learning process by integrating content that appeals to today's students, deploy new pedagogical elements, including multimedia assets, to increase student interaction with the text, develop a new series of digital assets designed to engage the modern student and provide assessment of learning outcomes.

Human Anatomy, Media Update, Sixth Edition builds upon the clear and concise explanations of the best-selling Fifth Edition with a dramatically improved art and photo program, clearer explanations and readability, and more integrated clinical coverage. Recognized for helping students establish the framework needed for understanding how anatomical structure relates to function, the text's engaging descriptions now benefit from a brand-new art program that features vibrant, saturated colors as well as new side-by-side cadaver photos. New Focus figures have been added to help students grasp the most difficult topics in anatomy. This is the standalone book. "Through his teaching, his textbook, and his online blog, Michael D. Johnson sparks interest by connecting basic biology to real-world issues relevant to your life. Through a storytelling approach ad extensive online support, Human Biology : Concepts and Current Issues, Seventh edition not only demystifies how the human body works but drives you to become a better, more discerning consumer of health and science related information." --

This full-color manual is designed for students with minimal backgrounds in science who are pursuing careers in allied health fields. Designed to support the twelfth edition of Hole's Essentials of Human A&P by Shier, Butler, and Lewis, this manual contains 49 laboratory exercises and reports, which are integrated closely to the textbook. Exercises are planned to illustrate and review the anatomical and physiological facts and principles presented in the text and to help students investigate some of these ideas in greater detail.

One of the best ways for your students to succeed in their biology course is through hands-on lab experience. With its 46 lab exercises and hundreds of color photos and illustrations, the LABORATORY MANUAL FOR GENERAL BIOLOGY, Fifth Edition, is your students' guide to a better understanding of biology. Most exercises can be completed within two hours, and answers to the exercises are included in the Instructor's Manual. The perfect companion to Starr and Taggart's BIOLOGY: THE UNITY AND DIVERSITY OF LIFE, Eleventh Edition, as well as Starr's BIOLOGY: CONCEPTS AND APPLICATIONS, Sixth Edition, and BIOLOGY: TODAY AND TOMORROW, this lab manual can also be used with any introductory biology text.

This best-selling Laboratory Manual, written by Terry R. Martin, has been updated throughout. The new 14th edition is available in a Cat version or a Fetal Pig version. Both versions of the 14th edition are organized into units that correlate directly with the text and include new and updated art to match Hole's Human Anatomy and Physiology, 14e.
