ENGINE TOP END 5-7 Cylinder

Head Compression Measurement

- Before measuring compression, do the following. Be sure the battery is fully charged.

Thoroughly warm up the engine so that engine oil between the piston and cylinder wall will help seal compression as it does during normal running.

What To Look For When Your Kawasaki FB460V Engine Has No ...

Another type of backfire that can occur in a 23 HP Kawasaki engine is caused by having a poorly tuned carburetor. If the carburetor isn't working properly, it can get the mixture of fuel and air in the incorrect ratio.

Sometimes, too much fuel is delivered to the combustion cylinders for a given amount of air. This is called running rich.
