The first of its kind, this book traces the evolution of motion picture technology in its entirety. Beginning with Huygens' magic lantern and ending in the current electronic era, it explains cinema's scientific foundations and the development of parallel enabling technologies alongside the lives of the innovators. Product development issues, business and marketplace factors, the interaction of aesthetic and technological demands, and the patent system all play key roles in the tale. The topics are covered sequentially, with detailed discussion of the transition from the magic lantern to Edison's invention of the 35mm camera, the development of the celluloid cinema, and the transition from celluloid to digital. Unique and essential reading from a lifetime innovator in the field of cinema technology, this engaging and well-illustrated book will appeal to anyone interested in the history and science of cinema, from movie buffs to academics and members of the motion picture industry.

An Erotic Paranormal Romance... After a series of girls are ritualistically murdered on the cold streets of Philadelphia, seasoned detective, Sydney Willows, is forced to work with sexy, alpha vampire, Kade Issacson. While working the case, Sydney finds herself

inexplicably drawn to Kade, fighting the passion she feels towards him. Kade, determined to solve the case and mete out justice, is captivated by the independent, fiery detective. As he attempts to protect her from a very real murderer, Kade grows concerned that the beautiful, but very human detective, could easily end up dead should she tangle with supernatural forces that are beyond her control. The investigation leads them into a dark and dangerous world, deep in the heart of New Orleans, where together, they search for the perpetrators of the Voodoo killings. Sydney soon becomes the target of the killer and ends up fighting for her life and love in the Big Easy. If she makes it out alive, will she give into the intoxicating desire she feels for Kade?

"The book examines a series of practical goldsmithing projects, each of which has been successfully completed by student goldsmiths using its instructions ... The creation of rings, chains, bracelets, earrings, and clasps, the use of specialized tools, as well as hand positions, movements, and technical data are described in lucid text and demonstrated with an abundance of detailed color photos"--Cover.
