Solution: Balance the equation using the half-reaction method outlined in the Balance Redox Reaction Example. This reaction is the same one used in the example but was balanced in an acidic environment. The example showed the balanced equation in the acidic solution was: $3\text{Cu} + 2\text{HNO}_3 + 6\text{H}^+ + 3\text{Cu}^{2+} + 2\text{NO} + 4\text{H}_2\text{O}$ There are six H^+ ions
