corruption of a table;

## **RMAN Tablespace Point-in-Time Recovery (TSPITR)**

RMAN Specific Tablespace Restoration From the available RMAN backup, we will restore the system, sysaux, undo and the required tablespace. What we have, is the following backup pieces, and we wish to restore user specific tablespace from that. 1) SPFILE.bkp 2) Controlfile.bkp 3) database.bkp >set oracle\_sid=samsung >rman

## **RMAN Single Tablespace Restoration - tech@padipa.net**

I have 2 tablespaces which I want to backup when they are in a consistent state (let's say T0). When problems occur (T1), I want to be able to restore both tablespaces to their state at T0 without recovering all changes that occurred between T0 and T1 (I want to ignore them all). What I could do so far is backing up and recovering tablespaces (with changes that occurred after the backup, which ...

## **sql - rman : how to only restore a tablespace (without ...**

The three tablespaces are the one you need to recover, System, and Rollback or Undo. The two Net Services files requiring editing are tnsnames.ora and listener.ora. The one copy of a parameter file is a copy of the production database's initialization parameter file. You use the same db\_name value as what is in production.

## **RMAN Tablespace Point in Time Recovery**

Recovery Manager (RMAN) TSPITR enables quick recovery of one or more tablespaces in a database to an earlier time without affecting the rest of the tablespaces and objects in the database. RMAN TSPITR is most useful for the following situations:

## Creating Transportable Tablespace Sets from Backup with RMAN

How to recover from a DROP or TRUNCATE table by using RMAN.-----There are three options available: 1. Restore and recover the primary database to a point in time before the drop. This is an extreme measure for one table as the entire database goes back in time. 2. Restore and recover the tablespace to a point in time before the drop.

## Dilip's Oracle DBA Blog: Recover Tablespace Only RMAN

We need to restore some old data from table. Full database is too large and we don't have much space for restore full database. That's why we need to restore only tablespace or (ideally) table where this old data is.

## Ask TOM "Recover tablespace on anothe host or database"

Examples. Switching Datafile Filenames After a Restore: Example  
This example allocates one disk device and one tape device to allow RMAN to restore from disk and tape..  
RUN { ALLOCATE CHANNEL dev1 DEVICE TYPE DISK; ALLOCATE CHANNEL dev2 DEVICE TYPE sbt; SQL "ALTER TABLESPACE tbs\_1 OFFLINE IMMEDIATE"; SET NEWNAME FOR DATAFILE '/disk7/oracle/tbs11.f' TO '/disk9/oracle/tbs11.f'; RESTORE ...

## **Rman Restore Only One Tablespace - logisticsweek.com**

Rman restores the datafile of the read only tablespace into the original location while ignoring the skip read only option. This happens when the read only tablespace has been put 'read write' and back to 'read only' between the time of the backup and the duplicate.

## **RMAN DUPLICATE SKIP READ ONLY DOES NOT SKIP READ ONLY ...**

By Franck Pachot . In a previous post I explained how to use transportable tablespace from a standby database. Here I'm showing an alternative where you can transport from a backup instead of a standby database. RMAN can do that since 10gR2. Transportable Tablespace is a beautiful feature: the performance of physical copy and the flexibility of logical export/import. But it has one drawback ...
