The informative and witty expose of the "bad science" we are all subjected to, called "one of the essential reads of the year" by New Scientist. We are obsessed with our health. And yet — from the media's "world-expert microbiologist" with a mail-order Ph.D. in his garden shed laboratory, and via multiple health scares and miracle cures — we are constantly bombarded with inaccurate, contradictory, and sometimes even misleading information. Until now, Ben Goldacre masterfully dismantles the questionable science behind some of the great drug trials, court cases, and missed opportunities of our time, but he also goes further: out of the bullshit, he shows us the fascinating story of how we know what we know, and gives us the tools to uncover bad science for ourselves.

Sein Vater war der Dorfschneider Johann Helmann Jung (1716-1802), der in der Lebensgeschichte "Wilhelm" genannt wird, seine Mutter Johanna Dorothea geborene Fischer ("Dortchen", evtl. auch Dorte genannt; * 1717) verstarb am 19. April 1742, als Jung 18 Monate alt war. Jung wuchs in einer der damals üblichen Großfamilien auf. Diese zählte zum unteren Mittelstand; neben dem Einkommen des Vaters und Großvaters besaß die Familie ein eigenes Haus und eine teilselbstversorgende Landwirtschaft. Jung wechselte nach dem Besuch der Dorf- zur Lateinschule, die er mit 14 Jahren verließ. Nach seiner Konfirmation erhielt Jung die erste Schulmeisterstelle. So war er nun regelmäßig von donnerstags bis samstags als Lehrer in Dörfern seiner Heimat tätig. An den übrigen Wochentagen arbeitete er in der Schneiderei seines Vaters.
