Textbook history tells us that Rizal wanted to be an ophthalmologist ... This is different from the eyes, ears, nose and throat (EENT) specialty that the Americans brought to the Philippines.

The twelfth edition of this textbook has been fully revised to present undergraduates and ENT trainees with the most recent advances in the diagnosis and treatment of ear, nose and throat diseases. Organised by anatomical region, each section begins with anatomy and physiology then covers the investigation, diagnosis and management of related diseases and disorders. Each section includes multiple choice questions (MCQs) for self assessment. This new edition includes many new illustrations, as well as additional chapters on neck masses, chemotherapy for head or neck tumours, otolaryngologic concerns in syndromal children, and histopathology of common ENT diseases. Key points Fully revised, new edition on ear, nose and throat diseases Organised by anatomical region, covering many disorders MCQs included for self assessment in each section Nearly 400 full colour images and illustrations Previous edition published in 2008

This is the thoroughly rewritten and revised edition of a popular and comprehensive textbook in otorhinolaryngology and head-neck surgery that covers theoretical, clinical and practical aspects of the subject, including recent advances. The text has been improved and modified keeping in mind student feedback. In this edition new information has been added based on the development in the speciality to keep the book up-to-date and contemporary. It is a unique textbook written in a simple, lucid manner and is a must for every undergraduate medical student who seeks to acquire knowledge in all essential aspects of this subject. The postgraduate students will also find this book useful as a comprehensive preparatory manual for their examinations. The book is full of colour illustrations and clinical material in an atlas form that will be useful for both the students as well as the practitioners. It also covers basic aspects of allied subjects like anaesthesia, radiotherapy, chemotherapy, etc.

It is a very popular book and widely read by medical students and doctors in south Asia and other English speaking parts of the world

A textbook in the Illustrated Colour Text series on ENT, aimed at medical students and junior doctors. Concise presentation of ENT in the attractive ICT format - clear line diagrams, colour photos of clinical conditions, summary boxes etc. Covers a topic which is important in primary care - medical students and junior doctors are motivated to buy a book in this area. Basic anatomy and physiology is reviewed - useful revision for students in clinical years. Comprehensive coverage of both presenting symptoms and specific diseases, with more detail on the commoner conditions. Clear description of examination and investigation techniques.

Covers basic principles of diagnosis, recognition of causative factors, and management of the more common problems.
